

JALIB KENZ

Software Development Engineer | Java, MERN & Python | FinTech & Payment Systems

M3B3 Building, Doha, Qatar | +974 7117 3439 | jalibkenz@hotmail.com | jalib.kenz.in

Valid Transferable Qatar Work Visa (NOC available) - Immediately Available | Qatar Driving Licence (Manual & Auto)

PROFESSIONAL SUMMARY

Software Development Engineer with 14 years of engineering experience spanning full-stack development, FinTech, payment systems, and enterprise IT, including 8 years based in Qatar. Deep hands-on experience with Qatar's banking and payments ecosystem (QIIB, NAPS, TSYS, VISA/Mastercard, EFT-POS, IBM AS400). Builds web applications and websites across the MERN stack (MongoDB, Express, React, Node.js), Java (Spring Boot, microservices, REST APIs), and Python. Recently completed Java Full-Stack training (JSpiders) and delivered a production-style microservices e-commerce platform. Holds a valid transferable Qatar work visa and is immediately available. Seeking a Software Development Engineer, Java Developer, Full-Stack, or Backend Developer role in Qatar.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, PHP, C, C++

Full-Stack / MERN: MongoDB, Express.js, React, Node.js, REST APIs, HTML5, CSS, jQuery, AJAX

Java: Spring Boot, Spring, Hibernate, Struts 2, JDBC, Microservices, Swagger / OpenAPI, JSP

Python: Scripting, automation, back-end services, data validation

Databases: PostgreSQL, MySQL, MongoDB

Payments / FinTech: EFT-POS deployment, ATM & card operations, VISA / Mastercard, TSYS, NAPS, IBM AS400.

Tools & Platforms: Claude Code, Git, GitHub, GitLab, IntelliJ IDEA, VS Code, Jira, ServiceNow, Linux, Windows

Concepts: OOP, RESTful API design, Microservices, SDLC, Agile, API Documentation

PROFESSIONAL EXPERIENCE

Software Development Engineer Aug 2021 - Present (5 Years)

KENZ SYSTEMS LLP, Kozhikode, India

- Design and build web applications and websites using the MERN stack (MongoDB, Express, React, Node.js), Java (Spring Boot), and Python for clients across Qatar, India, and Jordan.
- Integrated and supported digital payment systems (BharatPe, PhonePe), QR sound boxes, and NFC tap-to-review merchant solutions.
- Completed Java Full-Stack training (JSpiders) and delivered software, FinTech, and IT-consulting engagements.

ATM & Cards Operations Officer - Electronic Banking Department Feb 2014 - Nov 2019 (5 Years 10 Months)

Qatar International Islamic Bank (QIIB), Doha, Qatar

- Developed SQL scripts and automated queries for daily NAPS payment settlement to the PRIME core banking system (IBM AS400), removing manual reconciliation errors.
- Designed and maintained databases and operational workflows for ATM card production, error tracking, and dispatch cycles.
- Reconciled failed transactions and resolved disputes across VISA, Mastercard, SIBNET, TSYS, NCR, and WINCOR systems; recognised for zero SLA breaches over a 5-year tenure.

Computer / Project Engineer Apr 2013 - Jan 2014 (10 Months)

Mirus Technologies W.L.L., Doha, Qatar

- Designed and developed HTML5 responsive websites and Java web applications for hotel clients; earned the Best Cost-Effective Solution Provider Award for the Limousine Management System.
- Integrated 100+ PCs into a voting system for the IHF World Cup Conference; handled corporate email, document-sharing, and security systems.

Technical Support Representative (L1/L2) Feb 2020 - Jul 2021 (1 Year 6 Months)

IBM India Pvt. Ltd. (Client: Anthem Inc. US), India

- Delivered L1/L2 support for Windows and macOS enterprise environments; managed device onboarding via Microsoft Intune and MobileIron.
- Handled ServiceNow VIP tickets within SLA; supported VMware, Citrix Workspace, and MS Exchange. Won multiple performance awards.

Junior Programmer to Lead Software Engineer Aug 2012 - Feb 2013 (7 Months)

Diligenz System Integrators Pvt. Ltd., India

- Solely designed and built ezSkill, an online skill-assessment and interview platform, using Java, Struts 2, and Hibernate.
- Contributed to ezTrack (Java/Spring cargo tracking) and built Mmark Survey (PHP5); patched an SQL-injection vulnerability and was promoted to Lead Java Engineer for ahead-of-schedule delivery.

PROJECTS & ENGAGEMENTS

- **EFT-POS FinTech Deployment** - TransferNow Technology, Qatar & Jordan. Deployed and configured EFT-POS terminals for major banks; 24x7 merchant field support during the 2022 FIFA World Cup, Qatar.
- **Kira Beauty - Microservices E-Commerce Platform** - Java, Spring Boot, PostgreSQL, MongoDB, Razorpay, Swagger. Independent microservices for order, payment, and notification with payment integration.
- **Edges+ AI ERP Suite** - Edges Plus AI Technologies (2026). As product owner, drove requirements to production with the CTO across Retail, Jewellery, HRMS/CRM, Facility Management, and Real Estate AI ERPs.
- **IT & BMS Consulting** - Aquatic Research Center (GEIC) & Baytik Audit, Qatar. Active Directory and network administration, M365 / Google Workspace, BMS monitoring, and bilingual corporate websites.
- **Web Development** - Built 12+ client websites and contributed to bhoomikareal.com, a real-estate listing portal, using PHP, MySQL, HTML, and jQuery.
